Executive summary.

CFO with twenty years of senior finance leadership in the energy sector. Currently responsible for finance, strategy and transformation at Finland's largest nuclear power producer, generating approximately 30% of national electricity.

Energy infrastructure and large-scale capital assets, multi-jurisdictional finance transformation, and decision-ready business cases for multi-billion-euro capital programmes. Board, owner and investor counterpart in IFRS, public-company readiness, project finance and long-horizon capital planning.

Areas of expertise.

Ten areas of concentration across finance, capital and governance.

01	Energy & Infrastructure Finance	02	Sustainable Business Case Development
03	Capital Planning & Project Finance	04	Finance & Digital Transformation
05	Corporate Finance & Growth	06	P&L Management & Forecasting
07	Board, Investor & Stakeholder Relations	08	IFRS, Compliance & Public-Company Readiness
09	Risk Management & Due Diligence	10	International & Cross-Functional Leadership

Professional experience.

Twenty years of senior finance leadership across power generation, renewables and clean technology.

2025–PRESENT
CURRENT

Chief Financial Officer
TVO, Teollisuuden Voima Oyj. Finland.
SIGNATURE ACCOUNTABILITY

€130M

Created and now hold full accountability for an enterprise transformation programme delivering roughly €130M in recurring annual value across operations, finance and IT.

- Lead financial strategy, operations, finance transformation, and IT for one of Finland's largest power producers, generating ~30% of national electricity. Full P&L responsibility, anchored in long-horizon energy-asset economics.
- Drive capital planning and infrastructure project-finance for programmes in the billions, building business cases that align operational, regulatory and corporate-growth horizons.

- Hold CFO accountability for TVO's Green Finance programme: in 2025, TVO became the sector's first issuer of a European Green Bond Standard-aligned bond (€500M), with 99.8% of group turnover and 100% of taxonomy-relevant CapEx and OpEx aligned. The 2026 framework update extended sustainable financing to green bank loans. Serve as primary financial liaison to Board, owners, and key stakeholders.

2016–2025

NINE YEARS

Vice President, Business Finance / General Manager

Neste. Switzerland, Netherlands and Finland.

SIGNATURE ACCOUNTABILITY

Neste NEXT

Senior finance leadership role in the group-wide Neste NEXT transformation, reshaping operating model, capital allocation discipline, and performance frameworks across business units.

- Led financial operations and planning for Neste, in renewable fuels and circular solutions, through nine years of international growth.
- Built and led a finance organisation of approximately 80 Business Controllers and Finance Directors across multiple countries, partnering with the business to construct sustainable business cases for renewable-fuel growth investments.
- Led finance transformation across business units: FP&A platform, redesigned management reporting, performance frameworks, decision-support tooling. Ensured statutory and IFRS compliance through international expansion. Owned Board and Executive Committee communications.

2015–2016

OFFSHORE WIND

Head of Performance Control & Business Partner

Siemens Wind. Denmark.

SIGNATURE ACCOUNTABILITY

Profit recovery

Senior finance leader in the Siemens Wind profit recovery programme, restoring margins across offshore project portfolios valued at €500M to €1.3B.

- Directed cross-regional teams in performance control, cost management, and business-case validation for large-scale offshore wind projects valued at €500M to €1.3B.
- Strengthened project profitability, financial modelling, and capital-allocation discipline through stricter business-case stress-testing. Provided senior counsel on resource planning, internal valuation, and project-controlling systems.

2010–2014

CLEAN ENERGY

Head of Planning & Reporting

Fortum Power and Heat Oy. Finland.

- Led the integration of BI tools and the standardisation of financial reporting across multiple jurisdictions in the clean and low-carbon energy sector.
- Designed and implemented financial systems and processes, materially improving data governance and management reporting for a €7B group. Partnered with regional Finance Directors and executive leadership on finance initiatives.
